

THIS BLOCK PROTECTS YOUR HOME

The

RESKO

System Block

Floodings are basically parts of nature.

Unfortunately they can easily become a catastrophe when people and their living space are involved.

Due to the continuously increase of the average temperature, extreme weather conditions are more frequent.

We have to be prepared to the fact that such catastrophic floodings will become no exceptions.

Every year whole neighbourhoods are under water, living spaces are destroyed and people lose all their belongings.

In order not to fall victims,
we have to act now.

Because of this terrible happenings, we decided to find a solution:

The

RESCO

System Block

Statically tested and field tested!

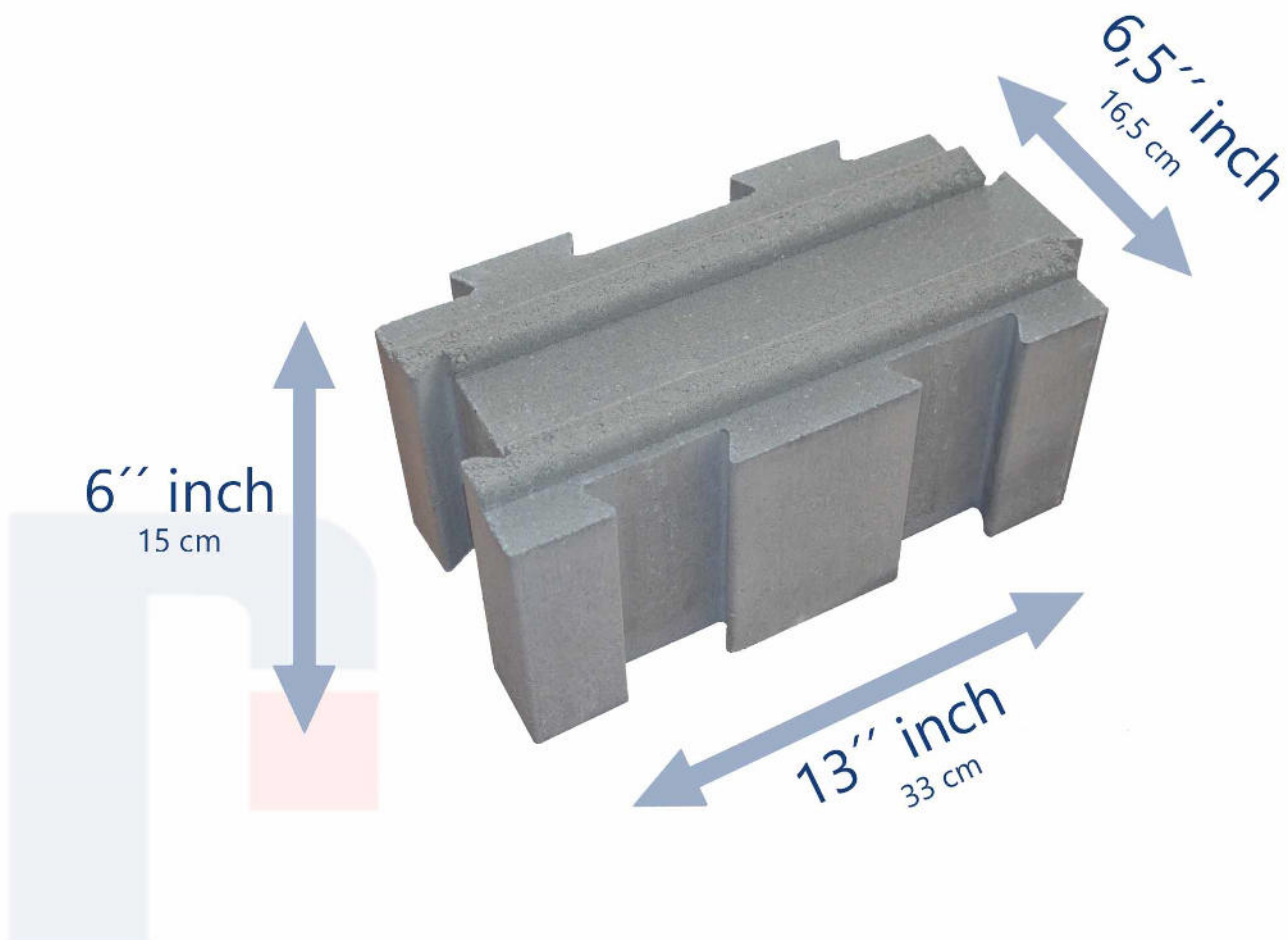

SIZE & MEASURES:

Material: concrete

Weight: about 40 lbs

60 blocks per Euro palett

1200 blocks per lorry

Application:

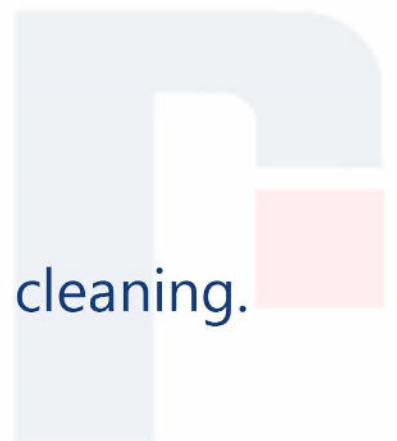

The Resco System Block is easily built up block by block to a protection wall.

This wall can be extended easily and fast into every direction.

After use, the wall can be removed immediately.

The blocks can be reused again after cleaning.

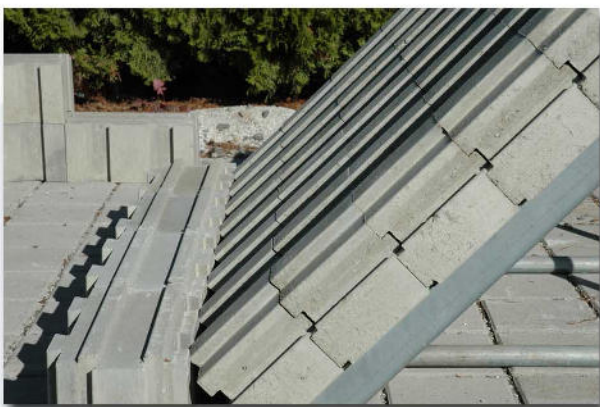

Flooding Protection:

Obstruction of banks

Dam and pond construction

Retaining Wall Road Blocks

Garden Design

Mudslide Protection
